-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 32, 36, 37-41 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 32 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted step is: the reaction is conducted at temperature of 60 to 110 °C. This step is essential because the amount of the desired product is dependent on the reaction temperature. Therefore, an appropriate correction is required.

In claim 36, the phrase " heating 3-cyclopropyl –beta- propiolactone " is recited. This expression is vague and indefinite because the specification does not elaborate how much heat is needed for the reaction to be complete. Therefore, an appropriate correction is required.

In claims 37 and 39, the phrase " n is greater than 1 " is recited. This expression is vague and indefinite because there is no upper limit for the range of n. Therefore, an appropriate correction is required.

In claim 38, the phrase " a temperature of about 60 to 110 C " is recited. This expression is vague and indefinite because there is no degree symbol (°) in the limitation. Therefore, an appropriate correction is required.
